- SeaChange has been collecting foreshore photos through the ShoreZone platform: <https://www.shorezone.org/interactive-shorezone-maps/>
- Value of marine riparian vegetation described in this paper. In particular, surf smelt eggs cooked and substrates get very hot without riparian vegetation. The shallow water and interstitial spaces become inhospitable for salmon foraging. <https://link.springer.com/article/10.1007/BF02784699>
