

Shared watershed pathways:

Shared Watershed Pathways in a Time of Cumulative Impacts

Jonathan Moore (Lead)
Tara Martin (co-lead)
Nigel Sainsbury (Project director)

What are positive paths forward for people and salmon?

**What are positive paths forward
for people and salmon?**

Justice—Cumulative
injustice in salmon
governance.

**Transformative justice in
salmon processes.**

What are positive paths forward for people and salmon?

Justice—Cumulative injustice in salmon governance.

Transformative justice in salmon processes.

Mapping—Land use and climate pressures cluster into archetypes. **Regional challenges -> regional solutions.**

What are positive paths forward for people and salmon?

Justice—Cumulative injustice in salmon governance.

Transformative justice in salmon processes.

Mapping—Land use and climate pressures cluster into archetypes. **Regional challenges -> regional solutions.**

Technical—Intricate pathways of effects, with curves more than cliffs. **Work within socially acceptable thresholds of risk and harm.**

What are positive paths forward for people and salmon?

Justice—Cumulative injustice in salmon governance.

Transformative justice in salmon processes.

Mapping—Land use and climate pressures cluster into archetypes. **Regional challenges -> regional solutions.**

Technical—Intricate pathways of effects, with curves more than cliffs. **Work within socially acceptable thresholds of risk and harm.**

Values—Diverse values and widespread support for greater salmon and riparian protections. **Protect thriving salmon systems.**

What are positive paths forward for people and salmon?

Justice—Cumulative injustice in salmon governance.

Transformative justice in salmon processes.

Mapping—Land use and climate pressures cluster into archetypes. **Regional challenges -> regional solutions.**

Technical—Intricate pathways of effects, with curves more than cliffs. **Work within socially acceptable thresholds of risk and harm.**

Policy—Salmon are falling through jurisdictional and policy cracks. **Opportunities in regional land-use plans with teeth.**

Values—Diverse values and widespread support for greater salmon and riparian protections. **Protect thriving salmon systems.**

What are positive paths forward for people and salmon?

Justice—Cumulative injustice in salmon governance.

Transformative justice in salmon processes.

Mapping—Land use and climate pressures cluster into archetypes. **Regional challenges -> regional solutions.**

Technical—Intricate pathways of effects, with curves more than cliffs. **Work within socially acceptable thresholds of risk and harm.**

Actions—124 potential actions ranging from governance shifts to habitat mitigations. **Impressive toolbox for recovery.**

Policy—Salmon are falling through jurisdictional and policy cracks. **Opportunities in regional land-use plans with teeth.**

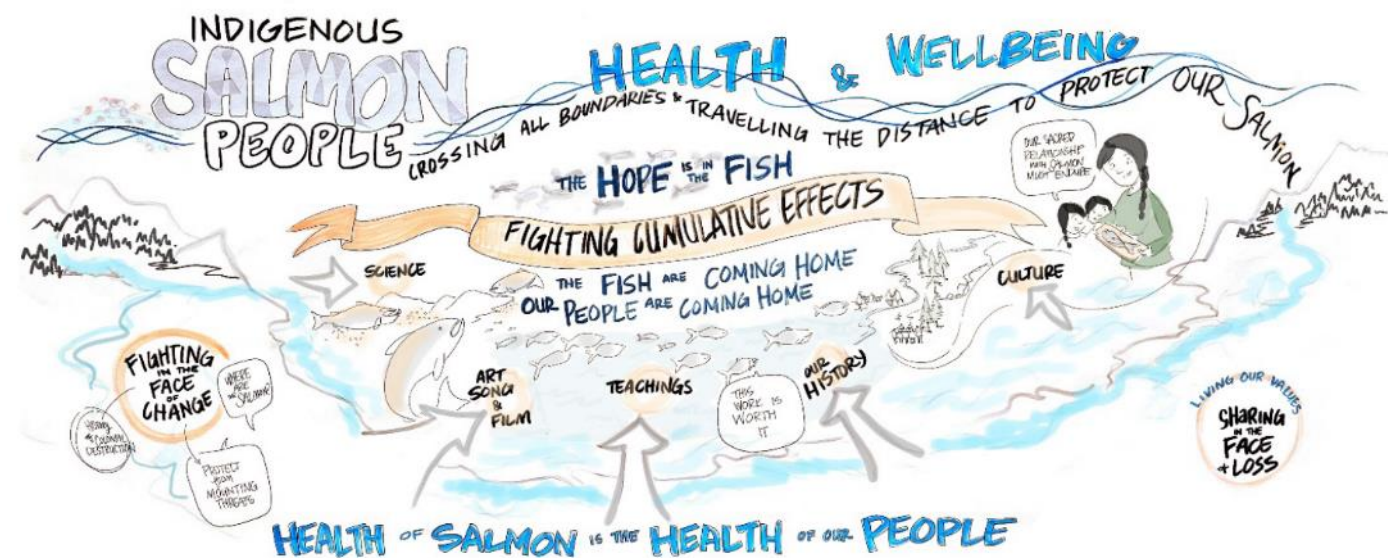

Values—Diverse values and widespread support for greater salmon and riparian protections. **Protect thriving salmon systems.**

International Indigenous Salmon Peoples Gathering
 Connecting Salmon Peoples in a World of Cumulative Effects
 November 17-20, 2025 | Shxwsh'iy Village | Chilliwack, BC

What are pathways forward for watersheds in a warming world?

Unclassified - Non-Classifié

FUTURE

The diagram illustrates two future pathways for watersheds, salmon, and people. A vertical arrow on the left points upwards, labeled 'FUTURE'. The background features stylized mountains in shades of green and brown. Two winding paths, one blue and one brown, represent different scenarios. At the bottom, silhouettes of a family (two adults and a child) stand on a path that splits into the two scenarios. Arrows point from the family towards the paths. A central text box contains the goal statement. A legend in the top right corner identifies the two scenarios.

Shared Watershed Pathways

Trajectories:

Low emissions scenario

High emissions scenario

Goal: Envision and empower sustainable and climate-resilient paths forward for BC's watersheds, their salmon and people

Shared Watershed Pathways

Trajectories:

Shared Watershed Pathways

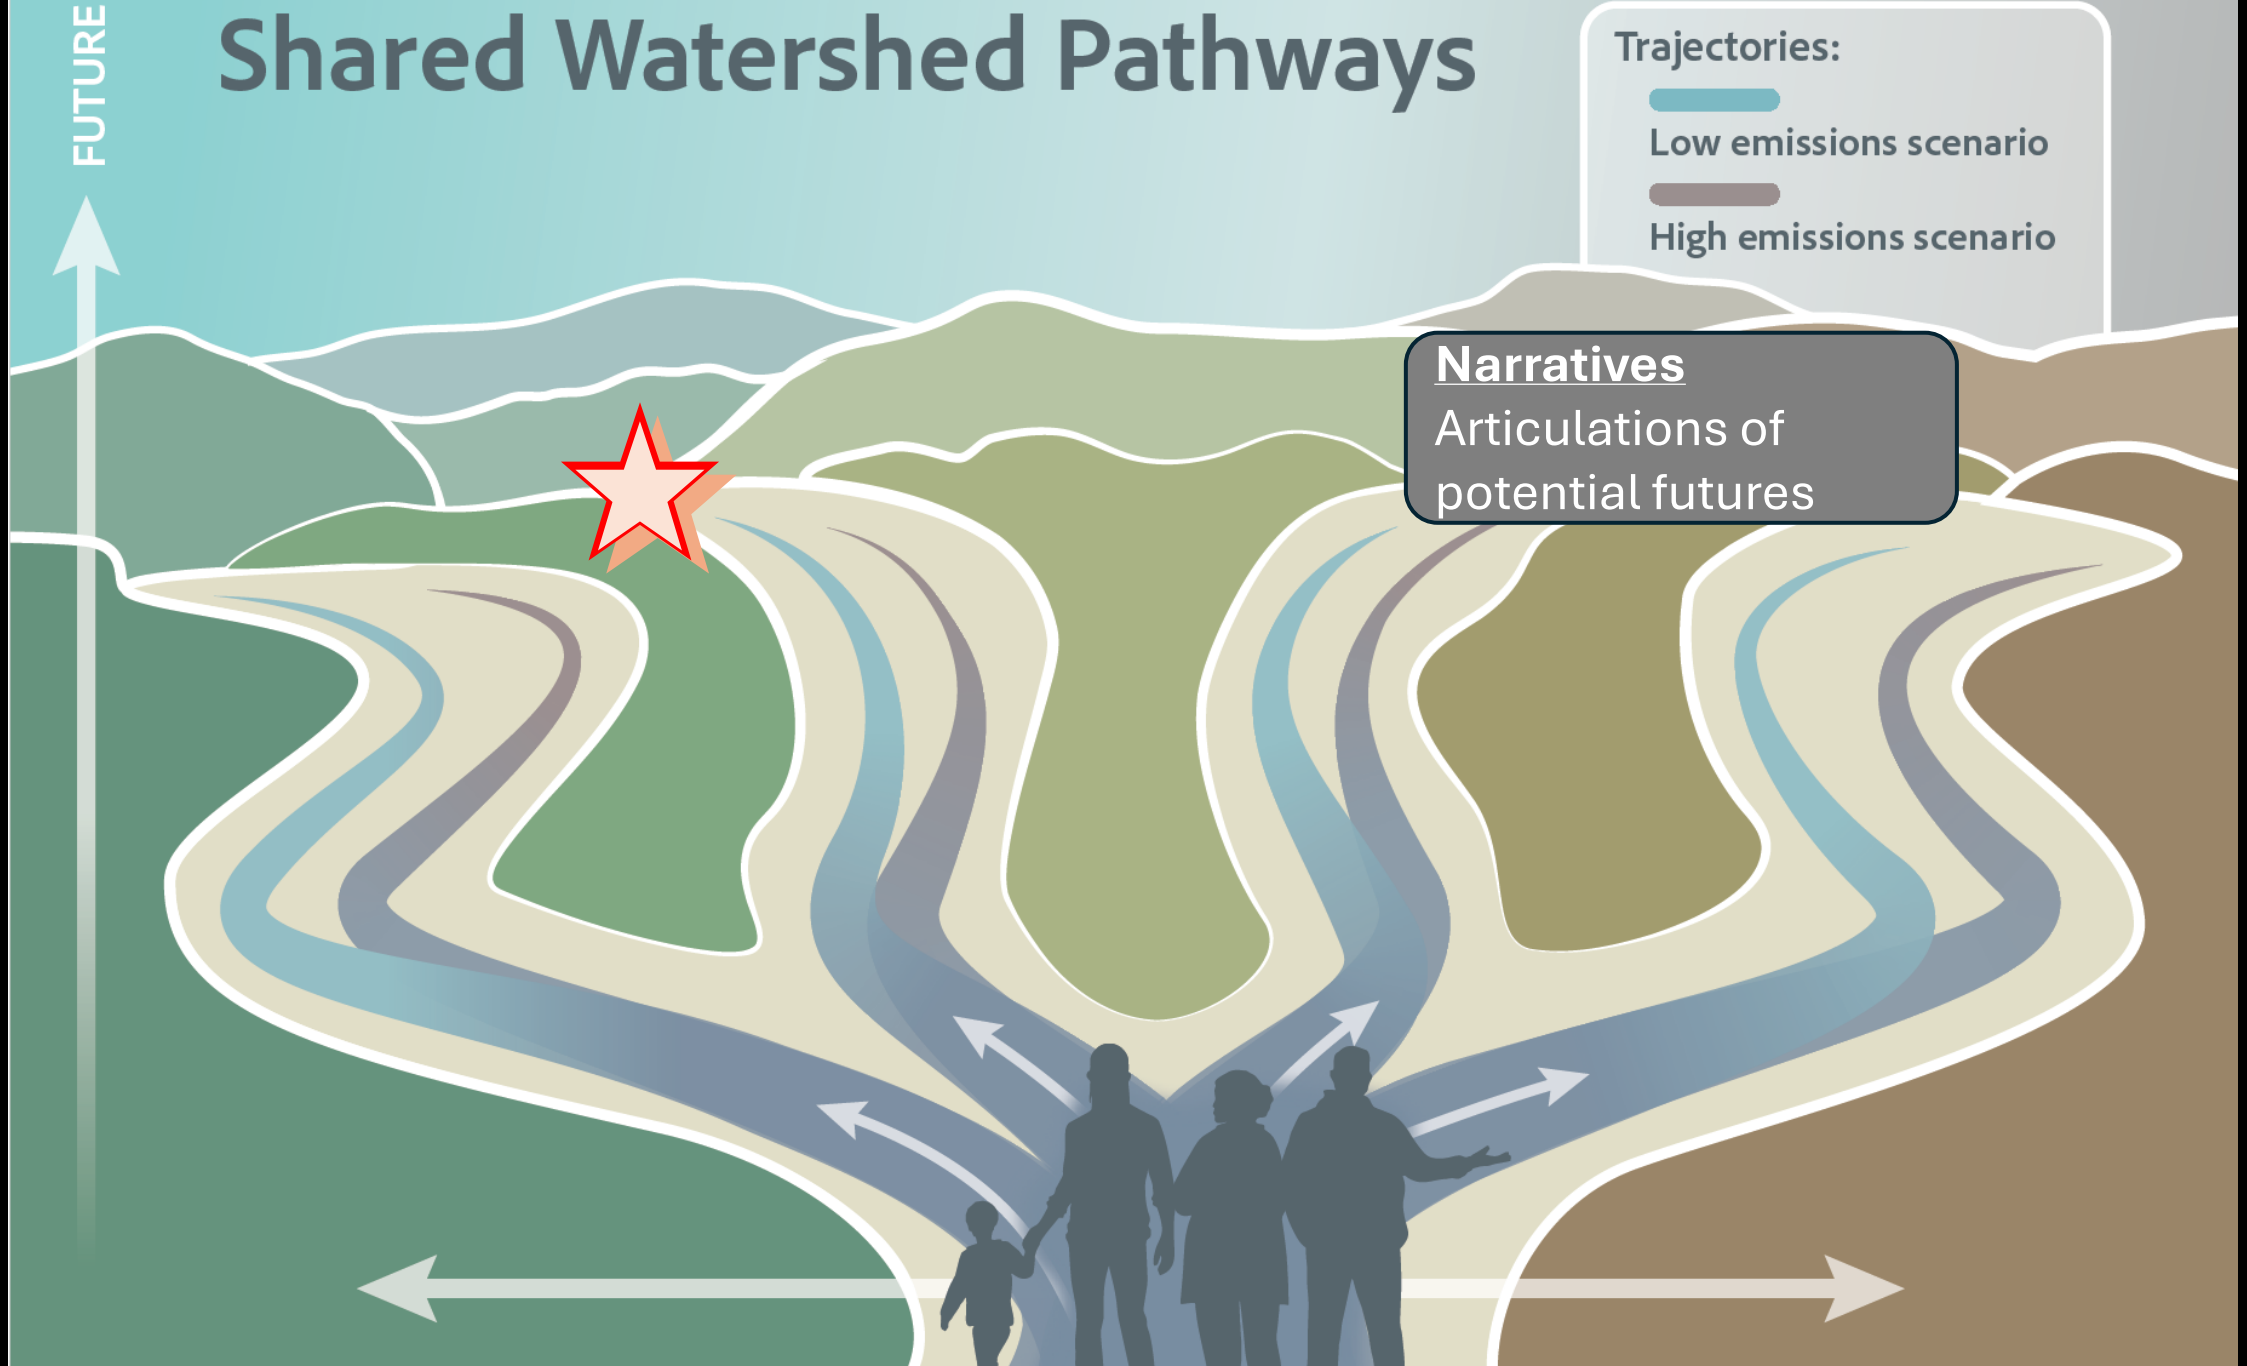

Trajectories:

Low emissions scenario

High emissions scenario

1. Envision pathways.
Explore alternative pathways

2. Stepping stones.
What are key actions that will take us down desired path?

3. Engagement.
Broad and strategic connections and communications
